Bauhaus Composition

Mircea Botezatu - 03774185

PARAMETERS

-Distance between panels
-Number and size of panels and spheres
-Proportion rules: golden ratio, thirds and quarters controlled by a seed number slider.

RELATIONSHIPS

The first two panels establish the foundation of the composition, with their proportions and positions adjustable according to the golden ratio. The secondary panels are then arranged based on spatial relationships, maintaining sufficient distance from one another to preserve the overall visual harmony. Finally, spheres are introduced to balance the planes and bring the composition together as a cohesive whole.
